ABOUT THE COMPANY

Our actions today create the next generation's future. With this thought in mind, we at E.P. Kamat Group are dedicated towards fostering a Clean, Green and Safe environment through every, single endeavour. Being ISO 9001-2015 certified and aligned with several apex bodies, we manufacture environment-friendly architectural products that define, beautify and protect people's homes and environment.

Starting with an annual turnover of INR 1.1 million and a group of seven employees in 1991, our compound growth has increased by 20% per annum, with the current manpower count at more than eighty highly committed, quality conscious and skilled employees. Our belief in the power of our Human Resource has enabled us to deliver several overseas orders time and again over the past several years.

E.P. Kamat Group is a group of companies consisting of:

EP Biocomposites Ltd.

OM VENTURES

EPEE Metal Goa Pvt. Ltd.

INFRASTRUCTURE

With state of art manufacturing setup, we at EP Biocomposites Ltd are able to manufacture quality products with precise repeatability and reproductivity.

Our manufacturing facility is spread over a built up area of 10,500 square feet.

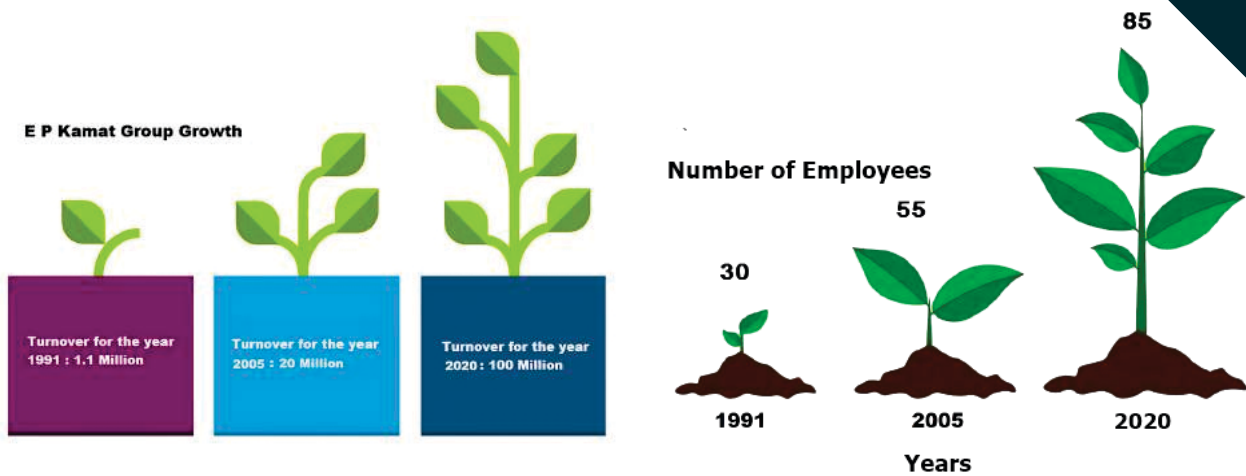

SOCIAL COMMITMENTS

GREEN PLUS

This initiative works on spreading awareness and offers tools for environment-friendly designs and executions. We work in coordination with organisations such as Indian Institute of Architects, Confederation of Real Estate Developers' Associations of India (CREDAI), Confederation of Indian Industries (CII) and the Government. Our aim is to foster a natural movement towards adoption of green practices for all construction activities.

OUR METHODOLOGY

1. CUSTOMER REQUIREMENT

The specific requirements of each customer are first gathered via an enquiry form, drawings, product specific requirements & delivery aspects. By understanding these customer requirements we ensure a smooth purchase process customized to each client's unique needs.

2. FEASIBILITY

We provide the assessment based on the specific requirements received from the customer by considering all aspects of end product and its application, into which our products are going to be a part of, including any potential difference which might occur at the time of its actual execution.

3. QUOTATION

A commercial estimate is generated and shared with customers by considering all aspects of the product, its end application, delivery & service.

4. PRODUCT DEVELOPMENT PROCESS

During the product development process we provide planning reports which consist of product design validation, engineering details, capacity planning, manufacturing tool readiness and approvals for production so as to enable ease of working with the final end product application.

5. PRODUCTION PHASE

Order received from the customer | Production planning (Material/Man/Machine Planning) Active in-process quality control (Process capability index i.e. CPK for customer specific dimensions are carried out on a mandatory basis) | Post-process monitoring (Final inspection and packing).

6. DELIVERY

EP Biocomposites Ltd manufactures products as per needs of customers with on-time and fast delivery. Contact us today for help with your needs. We ensure our product functions as needed in all situations.
