

KAMAT GROUP
Since 1991

EP BIOCOMPOSITES LTD

Contributing to a Clean, Green & Safe Planet

Over three decades of building **cleaner, safer spaces**

About Us

Being ISO 9001: 2015 certified and aligned with several apex bodies, EP Kamat Group is a pioneering conglomerate headquartered in Goa, dedicated to engineering solutions for a clean, green, and safe planet. Since 1991, we have grown from strength to strength, evolving into a trusted maker of robust FRP, laminated and fire doors, alongside pioneering bio-digester sanitation and wastewater recycling systems across Goa, North Karnataka and the Konkan region.

EP Kamat Group is the exclusive DRDO bio-digester technology holder in Goa, bringing patented, government-approved green sanitation directly to your doorstep.

35+
Years in Business

3,500+
Clients Served

2,000+
Projects Delivered

Why Choose Us?

- Goa's **FRP Door** leader 2,20,000+ doors supplied
- **Bio-digester** Goa's only DRDO license holder
- **STP and ETP** Among Goa's leading providers
- **Water recycled** 100 Million+ litres every day

Our Vision

To be the leader in sanitation, water recycling, and composite technologies that safeguard the environment by building and fostering a culture of sustainability.

Our Mission

To actively contribute towards a cleaner, greenerand safer planet

Brand Promise **Designed to Last** | **Driven by Sustainability**

Segments We Cater To

- Architects / Builders / Contractors
- Individuals / Residential & Commercial Complexes
- Industrial / Hospital Sectors
- Hospitality
- Government Department/ Institutions / NGO
- Channel Partners / Retailers

Bio-Digester Tanks & Toilets

Sustainable choices building a profitable future

Waste goes in. Water finds a purpose. Effortless Waste Treatment

FRP toilet cabin
Portable unit

Wastewater in
Anaerobic breakdown begins

Bio-Digester tank
Inoculum deactivates 99% of pathogens

99% of pathogens deactivated by **DRDO-engineered** bacterial inoculum under anaerobic conditions.

Wastewater	Bio-Digester	Treated Water	Gardening	Greener Surroundings
Cost Effective	Hassle Free	No Bad Odour	Eco Friendly	99% Less Organic Waste & Pathogens

Technology — **DRDO**

Output — **Nutrient-rich water**

Capacity — **Customisable**

FRP DOORS

Your Gateway to **Peace of Mind in Style**

What is an FRP Door?

An FRP (Fiber Reinforced Polymer) door is a high-strength sandwich structure made of lightweight Glass Fibre Polymers bonded to a solid insulated core. This advanced composition creates a door that incredibly tough, rigid, and resistant to environmental wear, while remaining light and easy to operate.

- Light Weight
- Termite Resistant
- Chemical Resistant
- Water Resistance
- Maintenance Free
- Easy Installation

Two Panel Classic

Six Panel Ecstasy

Four Panel Ecstacy

Six Panel Colonist

French Door

Fantasy With Glass

SHADE CARDS
(FRP DOORS)

Solid Colours

Wooden Finish

LAMINATED/WPC DOORS

Choose your finish. Skip the maintenance.

High Strength & Stiffness
Rigid, Stable Flush Panel

Easy Installation
Standard And Custom Sizes

Many Colours
Wood And Solid Laminates

Maintenance Free
Low Upkeep

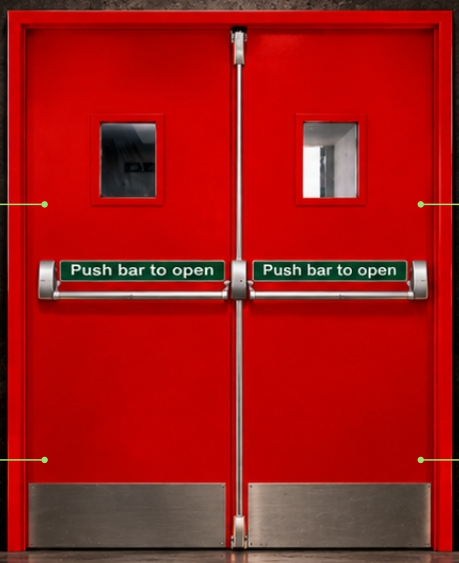

Laminate	Bonding	Sizes
0.8 mm / 1.25 mm, both sides	Thermosetting glue, hydraulic press	Standard and customised

FIRE-RATED DOORS

Choose safety. Protect what matters.

Quick, Efficient Evacuation
Push-bar exit hardware

Minimises Damage
Holds back fire

Contains Smoke & Gases
Barricade against smoke

Tough & Robust
Built as a complete door set

Standards
IS 3614 PART 2, BS 476 Parts 20 & 22, per NBC

3 Tests Passed
Insulation, integrity, stability

Fire Rating
120 mins.

Also Offered
Fire-rated cable coating, shaft sealing

Modular STP

Stop flushing money down the Drain

Recycle 90% of your water. Cut costs, not corners.

STP: Treats wastewater close to where it is generated, at building, campus or community level, instead of sending it to a distant central plant. This avoids long sewer lines and keeps treated water on-site for flushing, gardening and cooling. Compact modular units are quick to install.

Treatment Unit
Customised solution to treat waste on-site

Filtration Vessels
For High-quality treated water

Sewage and effluent in | **Bio STP Plus treats it** | **High-quality treated water** | **Up to 90% recycled**

One smart drop. **Reused** in many ways.

Toilet flushing | Cooling towers | Floor washing | Construction | Horticulture | Car washing

SBR	Fill, aeration, settling and decanting in one tank, in batches.
MBBR	Biofilm grows on media kept moving by air from blowers.
MBR	Membranes separate clear water from biomass for reuse.
OXY STP	Ozone and bio-oxygen break down COD, BOD and sludge in a mixing tank.

Modular STP
Apartments, Housing Colonies, Hotels

Modular ETP
Nursing Homes, Industries & Hospitals

Over 100 Million Litres
Treated and reused every day

Bio STP Plus blends technologies for each site and meets the 2020 pollution control norms. Standard or customised plants, plus CTE and CTO consultancy. Empanelled with the Goa State Pollution Control Board (2020-21).
